

Online Fire Safety Training

Convenient and cost-effective fire safety awareness training for you and your staff. Visit afptraining.co.uk to find out more.

Fire safety training from Argos Fire Protection Ltd.

The training consists of a series of slides to click through at your own pace, followed by a simple multiple choice test. Those achieving a pass mark will receive a customised certificate by email. Designed specifically for organisations to help comply with legal training requirements, the certificates and results go to the company admin, whilst the individual user receives notification of their score and any incorrect answers.

How does it work?

The course may be purchased online in either single use or multiples of ten at a discount - go to afptraining.co.uk. Alternatively for high volume purchasing please contact us on 0800 378676 or sales@afptraining.co.uk to discuss pricing. Existing customers of Argos Fire Protection Ltd can purchase the course on their usual credit terms by contacting Argos Fire. Once signed up, the company admin will receive an email containing the log-in details for the course which need to be forwarded to all participants. The log-in allows unlimited access to the course itself and the test until all users have passed and received a certificate.

COMPANY FIRE PROCEDURES

ON DISCOVERING A FIRE

- Raise the alarm
- If appropriate, switch off equipment
- Close windows and doors when leaving the room
- Proceed to the nearest fire exit following the fire safety signs

GOOD HOUSEKEEPING

Empty waste bins regularly to remove potential sources of fuel and prevent fires.
